

**948 i : NACO Contribution (June 29, 2007)**

n = National level Name Authority Record-New (includes personal names, corporate bodies, and geographic names)

nr = National level Name Authority Record-Revised (for example, adding a 4xx field) by UCLA (in the national file).

ln = Local Name Authority record-New or Revised (this includes personal names, corporate bodies, and geographic names for which we are creating our own original local record or are modifying the national record for local use only)

s = National level Series Authority Record-New

sr = National level Series Authority Record-Revised (for example, adding a 4xx field) by UCLA (in the national file).

ls = Local Series Authority Record-New or Revised (series for which we are creating our own original local record or are modifying the national record for local use only)

Use a separate subfield for each type of contribution. Precede the type of contribution with the number of records of that type.

[Note: we will no longer be counting DLC records for which we are not adding anything new. BSLW provides those records for us and we are loading them automatically.]

**Examples:**

\$i 2n \$i 1nr \$i 1s = two NARs created nationally; one NAR revised nationally; one SAR created nationally

\$i 1ln \$i 1ls = one local NAR revised; one local SAR created
